

DANIELS' ANNIVERSARY

FEATURING:

HOURS

MINUTES

SECONDS

DATE

UP DOWN INDICATOR

"My final collaboration with my great mentor Dr. George Daniels began in 2008. A series limited to 35 pieces numbered appropriately to commemorate the 35th Anniversary of George's invention of the co-axial escapement.

The Anniversary is a manually wound wristwatch with up down indicator, calendar mechanism and seconds dial in a style reminiscent of the famous tourbillon chronograph pocket watch created by George in 1994."

ROGER W SMITH

MOVEMENT

- Roger W Smith's single wheel version of the Daniels co-axial escapement
